

wayland::proxy\_t

```
graph BT; A[wayland::callback_t] --> B[wayland::proxy_t]
```

A diagram illustrating a relationship between two C++ types. At the bottom is a gray rectangular box containing the text 'wayland::callback\_t'. A blue arrow points vertically upwards from the center of this box to the center of a white rectangular box at the top, which contains the text 'wayland::proxy\_t'. The arrow indicates that 'wayland::callback\_t' is a base class or has some form of dependency on 'wayland::proxy\_t'.
